PROFESSIONAL SUMMARY

Insight-driven Data Analytics professional with a solid foundation in Applied Mathematics and practical experience transforming complex datasets into actionable business insights.

Proficient in SQL, Python, Excel, Power BI, Tableau, GCP, and Statistical analysis, with strong skills in data analytics, dashboard development, reporting, visualization, process automation, and stakeholder collaboration.

TECHNICAL SKILLS

Programming & Querying: SQL, Python, R

Databases & Cloud Platforms: BigQuery, MySQL, SQL Server, Google Cloud Platform, Compute Engine

Data Visualization & BI Tools: Power BI, Tableau, Looker Studio, Excel, Google Sheets

Python & R Libraries: Pandas, NumPy, SciPy, Matplotlib, Seaborn, ggplot2, dplyr, tidy

Analytics & Reporting: Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Statistical Analysis, KPI Reporting, Dashboard Development, Data Visualization, Trend Analysis

Business & Process Analysis: Business Analysis, Process Analysis, Process Improvement, Requirements Gathering, Stakeholder Management

Tools & Platforms: SPSS, Jupyter Notebook, GitHub, Microsoft Office Suite, PowerPoint

Professional Skills: Critical Thinking, Problem-Solving, Communication, Project Coordination, Project Management

PROFESSIONAL EXPERIENCE

PROCESS ANALYST

Watu Credit - Nairobi, Kenya

2025 - Present

- Analyze large operational datasets using BigQuery and Google Sheets to identify trends, anomalies, process gaps, and opportunities for operational improvement.
- Design and implement cross-functional workflows to improve process efficiency, standardization, and alignment across operational teams.
- Train operational teams on newly introduced workflows and process changes to support smooth adoption and long-term usability.
- Develop and document process maps, workflow recommendations, and business requirements for internal stakeholders and management teams.
- Facilitate stakeholder meetings to gather requirements, assess operational challenges, and align process improvements with business objectives.
- Implement automation solutions using Google Apps Script, BigQuery, Compute Engine, and other Google Cloud Platform tools to reduce manual work and improve operational efficiency.
- Monitor workflow performance and recommend improvements based on operational data, user feedback, and process analysis.

JUNIOR PROCESS ANALYST

Watu Credit - Nairobi, Kenya

2024 - 2025

- Implemented automation solutions using Google Apps Script, BigQuery, and Google Cloud Platform tools, reducing manual operational tasks by 30% and improving data accuracy.

- Designed interactive Looker Studio dashboards that enabled real-time operational monitoring and improved management reporting efficiency.
 - Analyzed operational datasets in BigQuery to identify trends, inefficiencies, performance gaps, and opportunities for process optimization.
 - Trained 100+ team members on new workflows and reporting systems, improving adoption and reducing process errors.
 - Supported the migration of the Customer Care ticketing system from Google Forms to a React-based platform, improving operational efficiency and user experience.
 - Collaborated with IT teams on integrating Google Speech-to-Text API workflows to automate operational transcription processes.
 - Automated 50+ recurring process functions, saving approximately 3 hours per day of the officer's time.
 - Worked on validating customer information from national identification cards using OCR and Python-based automation.
 - Supported AI-powered innovation initiatives focused on improving efficiency, reducing repetitive tasks, and enhancing operational workflows.
 - Worked with cross-functional teams to implement process improvements, track performance outcomes, and support data-driven decision-making.
-

MATHEMATICS TEACHER

The Komarock School
2023

- Improved student performance through data-driven teaching strategies and continuous performance analysis.
- Integrated technology into lesson delivery to enhance engagement and monitor academic progress.

- Conducted assessments and analyzed student performance trends to identify learning gaps and improve outcomes.
 - Led revision programs informed by academic performance metrics to strengthen exam preparedness.
 - Delivered tailored academic support and feedback to improve student understanding and achievement.
 - Contributed analytical insights during departmental discussions to support educational planning and decision-making.
-

TEAM LEADER

Kenyatta University Christian Union
2019 – 2022

- Led and coordinated teams to achieve organizational goals and improve operational effectiveness.
 - Monitored team performance metrics to identify productivity trends and areas requiring improvement.
 - Delegated responsibilities effectively while managing changing priorities and timelines.
 - Resolved complex member concerns and operational issues through collaboration and analytical problem-solving.
 - Facilitated meetings and coordinated communication between teams to ensure smooth execution of activities.
-

DATA ENTRY ASSISTANT

Kenyatta University
2018 – 2019

- Performed high-volume data entry while maintaining strong attention to accuracy and data integrity.

- Conducted statistical analysis using SPSS to generate insights from institutional datasets.
 - Managed complex Excel spreadsheets using advanced formulas and data organization techniques.
 - Verified and validated source documents to ensure consistency, completeness, and reliability of data.
-

PROJECTS

BOLT RIDE ANALYTICS

Tools Used: MySQL, Tableau, Excel

- Analyzed ride datasets to identify revenue trends, customer behavior, and peak ride periods.
 - Cleaned and transformed raw datasets for accurate reporting and analysis.
 - Built Tableau dashboards to visualize KPIs, including revenue growth and payment trends.
 - Identified operational insights, including dominant payment methods and popular pickup locations.
-

PHONE SALES DATA ANALYSIS

Tools Used: Python, Pandas, NumPy, Matplotlib, Seaborn

- Conducted exploratory data analysis to identify top-performing phone brands and models based on sales and pricing trends.
- Cleaned and preprocessed datasets using Pandas by handling missing values and improving data structure consistency.
- Created visualizations, including boxplots, line charts, and bar graphs, to analyze pricing and customer behavior trends.

- Applied statistical analysis techniques to evaluate relationships between discounts and sales performance.
 - Identified market positioning insights and factors influencing customer purchasing preferences.
-

VEHICLE LOAN ANALYSIS PROJECT

Tools Used: BigQuery, SQL, Looker Studio

- Analyzed vehicle financing datasets to identify trends in demographics, loan performance, income distribution, and customer behavior.
 - Wrote SQL queries in BigQuery to generate insights on loan-to-value ratios, customer risk patterns, and financing performance.
 - Built reports and dashboards in Looker Studio to support business reporting and operational monitoring.
 - Generated analytical insights to support strategic decision-making within asset financing operations.
-

EDUCATION

DATA ANALYTICS CERTIFICATION

IBM, Google, Microsoft & UC Davis – Coursera

POST GRADUATE DIPLOMA IN EDUCATION

Kenyatta University

BACHELOR OF SCIENCE IN APPLIED MATHEMATICS

Kenyatta University
